

Horizontal Surface Retarder

SPECETCH is a spray applied, chemical surface retarder specially engineered to expose the underlying aggregate of freshly placed horizontal concrete.

✓ Benefits

- Ready to use
- Does not alter natural color of aggregate or concrete
- Non-flammable, VOC Compliant
- Red dyed
- Typical etch is 1/4" to 3/8"
- Recommended for mix designs with 1/4" to 1/2" aggregate

Usage

- Horizontal surfaces
- Freshly placed concrete

Packaging

- 55 gallon drums (208.2 L)
- 5 gallon pails (18.9 L)
