

POLYMER-MODIFIED CONCRETE REPAIR/RESURFACING MORTAR

OVERCRETE is a one-component, polymer-modified concrete repair / resurfacing mortar for smoothing, resurfacing, and restoring concrete surfaces. OVERCRETE offers superior durability for all interior and exterior concrete applications.

✓ Benefits

- Long work time
- Easily to spread/trowel/finish
- Dries to a natural concrete gray
- Excellent adhesion
- Ideal for repairing rain slabs and all resurfacing
- Can be used on any concrete or block surface
- Can be applied horizontally, vertical or overhead

Usage

OVERCRETE is available in 2-formulations;

- OverCrete-Fine is blended with fine sands for a smoother finish on repairs from a feather to 1/2".
- OverCrete-Coarse is blended with fine/coarse sands for a broom finish on repairs from 1/8" to 1.5

Packaging

- 5 gallon pail (18.93 liters)
- 40 lb. bag
