

Silane-Siloxane Water-Based Penetrating Sealer

A 100% reactive, waterborne silane-siloxane sealer. This clear, penetrating, breathable water repellent is designed for use on interior and exterior above grade concrete or masonry surfaces. SpecShield WB penetrates the surface and bonds directly with the substrate, which results in a surface that is highly resistant to both moisture and salt.

✓ Benefits

- Provides excellent chloride screen
- Excellent water repellency while maintaining breathability
- Actual VOC = 0 grams/liter
- Reduces the effects of freeze-thaw cycling and weathering on concrete structures
- Long-lasting protections for new as well as old concrete surfaces
- Dries tack-free and skid resistant
- Water based, colorless and non-yellowing

Usage SpecShield WB helps protect concrete and masonry surfaces, decks, pavements, parking structures, ramps, bridges, marine platforms and more against the corrosive effects of de-icing salts, moisture and weathering to prevent spalling and deterioration of concrete structures.

Standards

- VOC Content: 0 g/l
- USDA Approved

Packaging

- 55 gallon drums (208.2 liters)
- 5 gallon pails (18 liters)
