

HYDROPATCH

Water Activated Asphalt Cold Patch

HydroPatch provides a high performance and cost-effective solution for permanent repair to asphalt and concrete surfaces. This environmentally friendly, cold-mix, water-activated product sets up rapidly and is traffic-ready immediately. Thanks to its revolutionary organic renewable additives, HydroPatch offers a permanent repair solution, thus eliminating the need for repeated repairs or replacements. It is a weather-friendly product, usable all year round, under any weather condition—hot or cold, wet or dry.

✓ Features/Benefits

- Easy to use – Just pour, add water, and tamp
- Durable – As robust as hot mix asphalt
- Fast and resilient – Traffic-ready immediately
- Cost-efficient – Avoids repeated repairs
- Environmentally friendly – Contains NO petroleum-based distillate solvents or cutbacks
- Quickly sealed – Can be sealed immediately after one-hour cure
- Simple – No tack coat required for repairs
- Versatile – No job too big or small
- Permanent – Prevents repeat repairs of the same pavement defect

HydroPatch comes ready-to-use and is easy to apply. Simply clear debris from the repair area, apply HydroPatch, add water, and tamp it down. It is a fast, easy, and permanent solution.
